Tumble Dryers

AquaVision indoor water container.

An innovative water collection system that sits in the large porthole door, allowing quick and easy access when its time empty.

Heat Pump Technology

Heat pump technology uses 30% cooler temperatures* for complete fabric care, ensuring your items are gently dried for a softer and longer life

40% Less Energy* - helps you save power, money and the environment.

*compared to a standard condenser dryer

Drying Level Regulation

4 drying levels: Ready to Iron, Hanger Dry, Wardrobe dry & Extra dry.

Super Easy Iron

Alternates the movements of the drum which reduces the folds & tangles

HEAT PUMP TECHNOLOGY

Heat pump tumble dryers have a condenser that separates water from the warm air that passes over the wet clothes and puts it in a water tank. The remaining dry warm air is then pumped back through the drum, re-using it to help the clothes dry faster. This makes them by far the most energy efficient of all the tumbler dryer types available.

Each ceramic sink is hand finished, so no two sinks are ever alike - sizes may vary by plus-or-minus 2%. We recommend measuring the actual sink before fitting to ensure the perfect fit.

Due to the variables in photographic, reprographic and printing processes, colours may vary from those of the actual products.
As we have a policy of continued improvement and development, we reserve the right to amend colours, specifications, prices or products without prior notice. E. & O. E.
